Product Overview

Precision Powder Processing

This semi-automatic auger filling machine is engineered for high-precision handling of various powdered and granulated ingredients. Its robust design ensures consistent filling performance across a wide spectrum of particle sizes and densities. Built to meet rigorous industrial requirements, it streamlines packaging workflows while maintaining excellent material flow control.

Technical Specifications

Operating Type	Semi-Automatic
Filling Method	Auger

Performance

Processing Features

- Variable solubility handling
- Density-optimized dosing
- Adjustable particle size compatibility

Compatible Material Types	Fine Powders, Granulated Substances, Industrial Materials, Culinary Powders
