

Semi-Automatic Sealing and Shrinking Machine

This semi-automatic machine integrates sealing and shrinking into a single operation. It is suitable for packaging cutlery, cartons, books, crafts, toys, and various industry products.

Product Overview

Versatile Packaging Solution

The Semi-Automatic Sealing and Shrinking Machine is a professional-grade packaging solution designed to handle a wide range of items, including hardware, cosmetics, stationery, and food products. The machine features a modular design, allowing the sealing unit and shrink tunnel to be operated either independently or in combination. Its flexible configuration makes it suitable for packaging products of almost any shape, providing reliable protection for transport, storage, and retail display.

Technical Specifications

Model Number	BSL-2015
Power Source	110/220/380V
Tunnel Temperature	0°C - 250°C

Performance Metrics

Key Operational Metrics

3000 pcs/h

Packing Speed

9 kW

Heating Power

10 kg

Conveyor Loading

Dimensions and Capacity

Tunnel Size	100x40x20cm
Shrink Size	400x200mm
Physical Dimensions	135x62x138cm
Machine Weight	95 kg

Applications

Compatible Industries	Food & Beverage, Pharmaceuticals, Hardware Tools, Cosmetics, Stationery, Consumer Goods
