Product Overview

Modern Material Handling Solution

This semi-electric lithium pallet truck is designed to modernize warehouse operations by significantly reducing physical strain on workers. It combines a compact, maneuverable frame with the reliability of lithium battery technology, making it an ideal replacement for traditional manual pallet jacks in tight spaces. With features like a quick-swap battery and enhanced braking, it offers a high-efficiency, low-maintenance solution for moving bulky goods safely.

Technical Performance

Key Performance Metrics

6 seconds

Battery Swap Time

Rated Load Capacity 1300 kg

Gradeability at Full Load 5 %

Features and Safety
