

Semi-Metallic Front Disc Brake Pads

Semi-metallic disc brake pads designed for front brake systems. These brake pads are compatible with ISSAN Pathfinder, NISSAN Frontier, and SUZUKI Equator models.

Product Overview

High-Performance Semi-Metallic Brake Pads

These semi-metallic front disc brake pads are engineered for durability and reliable stopping power. Designed for optimal safety and performance, they feature a non-asbestos formulation and are rated for consistent operation up to 350°C. They offer a service life of approximately 35,000 km, making them a dependable choice for automotive maintenance and repair.

Technical Specifications

| | |
|-------------------------------|---|
| Material Composition | Semi-Metallic (Non-Asbestos) |
| Maximum Operating Temperature | 350 °C |
| Estimated Service Life | 35000 km |
| Compatible Part Numbers | 41060-EA025, A-726WK, D1267M, D1080-JR70A |

Commercial Terms

| | |
|-----------------------------------|-------------------------------------|
| Delivery Terms FOB • CFR • CIF | |
| Minimum Order Quantity (Standard) | 200 SETS |
| Minimum Order Quantity (New Item) | 300 SETS |
| Production Lead Time | 45 to 60 days after advance payment |

Quality Assurance

| | |
|--|--------------------------------|
| Custom Production Capabilities | |
