

Semi-Outdoor LED Display Module

This LED display module is designed for applications requiring visibility in partially exposed environments. The module features a dense array of LEDs, arranged in a grid pattern, to provide high brightness and clarity.

Overview

High-Performance Semi-Outdoor LED Module

This 5.0 semi-outdoor LED display module is engineered for applications requiring reliable visibility in partially exposed environments. Featuring a dense LED grid, it delivers exceptional brightness and clarity for text, images, and video content. Its robust housing ensures durability and protection against environmental factors, making it a versatile choice for various outdoor settings.

Technical Specifications

Environment Suitability

Semi-Outdoor

Construction

- Robust housing
- Dense LED grid arrangement
- Environmental protection

Pixel Pitch

5 mm

Supported Content

Text, Images, Video
