Product Overview

Professional Semi-Rigid Fire Hose

This high-performance semi-rigid fire hose is engineered for demanding firefighting and industrial water delivery applications. Featuring a high-tenacity polyester jacket with integrated nylon helical reinforcement, it maintains its shape under pressure while offering excellent durability. It is an ideal solution for fire cabinets, wildfire suppression, and industrial water transport.

Construction & Materials

Jacket Construction	100% Virgin high-tenacity polyester, single jacket with nylon helical reinforcement
Lining	Polyurethane (PU) tube

Technical Specifications

Available Lengths

- 15m (50ft)
- 30m (100ft)
- 60m (200ft)

Applications & Compliance

Compliance & Standards

EN694 • CE

Primary Applications	Construction Sites, Agriculture, Industrial Water Hose, Wildfire Fighting, Fire Hose Cabinets
