

Sequin Attaching Interlock Sewing Machine

This specialized sewing machine is designed for attaching sequins to various materials. It creates chain stitch patterns and is primarily used for embellishing clothing fabrics, curtains, and other decorative trims.

Overview

Precision Sequin Attachment

This specialized interlock sewing machine is expertly engineered for attaching sequins to a wide variety of materials, including clothing fabrics, curtains, and decorative trims. It utilizes a chain stitch pattern to ensure secure and aesthetically pleasing embellishments. With electronic operation controls, users can easily adjust sequin spacing and utilize patching functions to achieve diverse embroidery styles.

Key Performance Metrics

Sewing Speed

1000 SPM
Max Speed

Sequin Diameter Range	3-6 mm
-----------------------	--------

Technical Specifications

Stitch Length	1.3 mm
Needle Type	UY128GAS11#
Needle Bar Stroke	6.3 mm
Feed Dog Height	4.4 mm
Number of Needles	31

Dimensions and Logistics

Machine Dimensions	610 x 400 x 630 mm
Parts List Reference	42/56

Features

Capabilities	Sequin Attachment, Chain Stitch, Patching, Electronic Control, Adjustable Spacing
