Overview

Precision Sequin Forming Solution

This high-precision sequin forming mold is designed for automated sequin production, offering exceptional durability and consistent output. Engineered for versatility, it supports a wide range of shapes and sizes, making it an ideal tool for apparel manufacturing and craft applications. With a robust design capable of over 500,000 cycles, this mold ensures reliability and high-quality results for demanding production environments.

Technical Specifications

Sequin Size Range	3mm - 11mm (14-48 lines)
Minimum Usage Cycles	500000 cycles
Sequin Interval Precision	0.01 mm
Mold Configuration	Double slice, interchangeable design

Features & Capabilities

Service Features

OEM Service • Fast Delivery • Customizable Shapes • Interchangeable Mold

Available Shapes	Moon, Flower, Star, Round, Square
