

# Series 86 Electrical Wall Switches and Sockets

This series features single, double, and triple control switches, along with specialized sound, light, and doorbell switches. Socket options include two-hole, three-hole (10A and 16A) with protective doors, five-hole sockets with protective doors, plus TV, telephone, and computer sockets.

## Product Overview

### Series 86 Electrical Solutions

The Series 86 range offers a comprehensive selection of electrical wall switches and sockets designed for modern, reliable performance. Featuring a sophisticated half-radius arc design, these units combine aesthetic appeal with practical functionality, including illuminated indicators for ease of use. Engineered for durability, the construction utilizes high-wear-resistant, self-lubricating insulating supports and imported spring steel to ensure consistent, premium tactile feedback.

## Design & Construction

### Key Features

- Half-radius arc design
- Illuminated indicators
- Snap-fit connection structure
- High-wear-resistant, self-lubricating insulating supports
- Imported spring steel for consistent tactile feedback

## Compliance & Quality

### Certifications

CE • CQC • ISO 9001:2000

## Product Range

### Model Reference Table

Function	Model Number
One-gang single/double control	CM0401 / CM0402
Two-gang single/double control	CM0403 / CM0404
Three-gang single/double control	CM0405 / CM0406
Doorbell Switch	CM0431
Sound & Light Control Switch	CM0430
Two-hole Socket	CM0451
Three-hole Socket (10A)	CM0452 / CM0453
Three-hole Socket (16A)	CM0454 / CM0455
TV Socket	CM0480
Telephone Socket	CM0481
Computer Socket	CM0482
