

Serrated Edge Garden Hoe with Fiberglass Handle

This garden hoe features a serrated edge for efficient weeding and soil cultivation. The handle is constructed from PE-coated fiberglass, offering enhanced strength, weather resistance, and a comfortable grip.

Product Overview

Professional Grade Garden Hoe

This durable garden hoe is engineered for efficient weeding and soil cultivation tasks. Featuring a high-strength forged rail steel head and a robust PE-coated fiberglass handle, it is designed for long-lasting performance in various gardening environments. The tool includes a cushion end grip to ensure comfort during extended use.
