Product Overview

High-Performance Serrated Grader Blade

This serrated grader blade is engineered for precision grading, efficient material distribution, and heavy-duty road maintenance. Constructed from durable 30MnB hardened steel, it offers exceptional wear resistance even in hard-packed surfaces. The serrated edge design significantly improves cutting performance and efficiency compared to standard blades, reducing overall operational downtime.

Material & Build

Material Composition

30MnB Steel

Design Features

Serrated Edge, Hardened Steel, Wear Resistant

Dimensional Specifications

Available Widths & Thicknesses

Width (mm)	Thickness (mm)
152	13
152	16
152	19
203	16
203	19
203	25

Available Lengths

- 1219mm (4ft)
- 1524mm (5ft)
- 1828mm (6ft)
- 2133mm (7ft)
- 2438mm (8ft)

Applications

Ideal For

Road Maintenance • Construction • Land Leveling • Earthmoving
