

Seven-Segment LCD Display Board

This electronic display board features three seven-segment LCD displays mounted on a circuit board. It is designed for displaying numerical data in electronic devices or systems.

Product Overview

Seven-Segment LCD Display Board

This electronic display board is engineered for precise numerical data visualization in electronic systems and devices. It features three distinct seven-segment LCD displays mounted on a robust green circuit board, supported by a comprehensive array of integrated circuits, resistors, and capacitors. Designed for reliability and clarity, this component is an ideal solution for integration into industrial instrumentation or monitoring equipment.

Technical Details

Display Type	Seven-Segment LCD
Display Count	3
PCB Features	Integrated Circuits, Resistors, Capacitors, Green PCB
Model Identifier	LCD037 03000Dce

Connection Interfaces

Available Pin Labels

- GND
- SC
- S2
- SJ
- SU
- FX
- FU
