

Sewing Machine Clutch Motor

This clutch motor is designed for industrial sewing machines and comparable equipment. It features a durable construction and offers precise speed control.

Overview

High-Performance Industrial Clutch Motor

This industrial-grade clutch motor is engineered for reliable, long-term operation in sewing machine applications. Designed for durability, it provides consistent performance and precise speed control necessary for demanding textile environments. It features a robust construction and is optimized for standard single-phase power setups.

Electrical Specifications

Voltage	110 V
Amperage	4 A
Frequency	60 Hz
Phase Operation	Single Phase

Performance Metrics

Power Rating

0.5 HP

Power

1725 RPM

Speed

Application Compatibility

Industrial Sewing Machines, Textile Machinery, Precise Speed Control
