

Sewing Machine Foot Control Pedal

This foot control pedal is designed for sewing machines and similar devices requiring variable speed control. The unit features a motor assembly connected to a foot pedal mechanism for comfortable operation.

Product Overview

Professional Foot Control Solution

This durable foot control unit is engineered for precise, variable speed regulation in sewing machine applications. Designed for reliability in demanding work environments, the assembly integrates a compact, electrically powered motor with an ergonomic pedal mechanism. It offers seamless control, making it an essential component for professional sewing equipment.

Technical Specifications

Model Number	SKT-104
Control Type	Variable speed foot pedal
Construction	Durable Housing, Industrial Grade
Application	Sewing machine motor speed control
