

Sewing Machine Needle Bar Driving Lever

Aluminum needle bar driving lever designed for sewing machines. It features a robust construction with two integrated ball bearings for smooth and efficient operation.

Product Overview

Precision-Engineered Sewing Component

This needle bar driving lever is designed specifically for high-speed sewing machine applications. Constructed from durable aluminum, the component features a robust build quality to ensure longevity and consistent performance. It incorporates two integrated ball bearings and a precision-machined pin to facilitate smooth, reliable operation during demanding sewing tasks.

Technical Specifications

Integrated Components

- 2 x Ball Bearings
- Precision-machined connection pin

Performance Features

Smooth Operation • Robust Construction • High-Speed Compatible

Material

Aluminum

Application Suitability

High-speed sewing, Industrial sewing machines, Needle bar drive systems
