

# Sewing Textile Machinery

This textile machinery is designed for various sewing applications. It features a compact design with a sturdy build.

## Product Overview

### Professional Textile Sewing Solution

This industrial-grade textile machinery is engineered for versatile sewing applications, featuring a compact yet robust construction. It is equipped with an integrated needle and presser foot mechanism designed to ensure high precision during fabric handling. Ideal for both professional workshops and refined sewing projects, this unit provides reliable performance for various textile tasks.

## Technical Specifications

### Rated Power

**15 Watt**

Power Consumption

### Model Number

201

## Key Features

### Core Features

- Precise needle and presser foot mechanism
- Integrated stitch selection dial
- Built-in bobbin winding system
- Compact and sturdy build

### Usage Suitability

Professional, Home Sewing, Textile Production
