Product Overview

High-Performance Network Connectivity

This SFTP CAT5E patch cord is engineered for stable and reliable data transmission in professional networking environments. Featuring shielded twisted pair construction, it effectively minimizes electromagnetic interference to maintain superior signal integrity. These cables are fully compliant with international quality and environmental standards, ensuring they meet the demands of high-speed Gigabit Ethernet applications.

Technical Specifications

Material Options

- Copper
- CCA (Copper Clad Aluminum)

Conductor Gauge	24AWG or 26AWG
-----------------	----------------

Available Lengths	0.5m to 30m
-------------------	-------------

Performance Testing	Passes Fluke Test
---------------------	-------------------

Compliance & Quality

Certifications	ROHS, ISO 9001:2000, ISO 14000, CE
----------------	------------------------------------

Logistics & Customization

Packaging Options	1pc/PE bag or OEM bag
-------------------	-----------------------
