

Shaded Pole Motor for Appliance Applications

Compact shaded pole motor designed for use in electric ovens and other kitchen appliances. It features durable construction for long-lasting performance and efficient cooling.

Product Overview

High-Efficiency Shaded Pole Motor

This compact shaded pole motor is precision-engineered for integration into electric ovens and a wide range of professional kitchen appliances. Built for durability, it ensures long-lasting performance and reliable, quiet operation in demanding environments. Its efficient cooling design makes it an ideal component for equipment where thermal management and consistent performance are critical.

Application Details

Primary Applications

Electric Ovens, Kitchen Appliances, Cooling Systems

Design Features

Key Features

- Compact form factor
- Durable construction
- Quiet operation
- Efficient cooling

Operational Noise

Quiet Operation
