

Shaded Pole Motor for Electric Ovens

This shaded pole motor is designed for electric ovens. It provides consistent torque for convection fan operation and rotisserie mechanisms.

Product Overview

High-Performance Oven Motor

This shaded-pole motor is expertly engineered for reliable operation within the high-temperature environments of electric ovens. It provides consistent torque essential for functions like convection fans and rotisserie mechanisms. Its compact design ensures seamless integration into existing oven assemblies while maintaining long-term durability for optimal performance.

Technical Specifications

Key Features

- High-temperature resistant construction
- Compact design for easy integration
- Consistent torque output
- Durable materials for long service life

Motor Type	Shaded Pole Motor
Primary Application	Electric Ovens, Convection Fans, Rotisserie
