

Shaded Pole Motor for Fan Heater and Freezer

This shaded pole motor is designed for use in industrial fan heaters, exhaust fans, and freezers. The motor features a robust construction and a simple shaded pole design for starting.

Product Overview

High-Efficiency Shaded Pole Motor

The YJ82 series shaded pole motor is a robust and compact electrical component engineered for low-torque applications. Featuring a durable grey metallic housing, it is optimized for consistent performance in challenging environments. This motor is a versatile solution ideal for integration into industrial fan heaters, exhaust ventilation systems, and commercial freezer units.

Technical Specifications

Key Features

- Compact and reliable design
- Durable grey metallic housing
- Integrated cooling fan/impeller
- Cost-effective starting mechanism

Motor Type	Shaded Pole
Primary Applications	Fan Heater, Exhaust Fan, Freezer
