

Shaded-Pole Motor for HVAC Ventilation

This shaded-pole motor is designed for HVAC&R applications. It is suitable for ventilation accessories such as fan coils and mechanically controlled fans, providing reliable performance for air movement.

Product Overview

High-Efficiency HVAC Shaded-Pole Motor

This single-phase, four-pole shaded motor is engineered for reliable operation in diverse HVAC and refrigeration environments. Designed to function seamlessly across 110V to 240V, it offers versatile compatibility for both 50Hz and 60Hz power grids. Its robust construction makes it an ideal solution for cooling and ventilation systems, including radiators, evaporators, and mechanical fan assemblies.

Technical Specifications

Phase	Single Phase
Poles	4
Rated Voltage	110V - 240V
Frequency	50Hz, 60Hz

Applications

Primary Applications

- Radiators
- Evaporators
- Refrigeration Equipment
- Fan Coils
- Roof Ventilation Systems
- Draft Fans

Certifications & Compliance

Motor Type

Shaded-Pole • HVAC-R Ready
