

Shaded Pole Motor for Kitchen Appliances

This shaded pole motor is designed for household appliances, especially kitchen appliances. It features a robust stator with laminated core and a dynamically balanced rotor for smooth operation.

Product Overview

High-Efficiency Shaded Pole Motor

This shaded pole motor is engineered for light-load starting applications, offering a stable and robust structure for kitchen and household appliances. It provides quiet operation and eliminates electromagnetic interference to ensure seamless integration into sensitive equipment. Designed for durability, the motor supports reliable performance in demanding environments like fryers, ovens, and dishwashers.

Technical Specifications

Typical Applications

- Fryers
- Ovens
- Heaters
- Humidifiers
- Exhaust fans
- Air conditioners
- Washing machines
- Dishwashers
- Microwave ovens
- Medical equipment

Safety Certifications

UL, VDE, TUV, 3C

Performance Features

Key Benefits

Low Noise • No Electromagnetic Interference • Reliable Operation • Customizable Production
