

Shaded Pole Motor for Kitchen Appliances

Compact shaded pole motor designed for use in electric ovens and other kitchen appliances. The motor provides efficient cooling and ventilation, ensuring optimal temperature control within the appliance.

Product Overview

High-Efficiency Kitchen Appliance Motor

This compact shaded pole motor is engineered specifically for reliable performance in electric ovens and various high-demand kitchen appliances. Its robust construction ensures an extended service life while providing efficient cooling and ventilation for optimal temperature management. The unit is designed to maintain low noise and vibration levels, making it ideal for residential and commercial kitchen environments.

Performance Features

Primary Applications

- Electric Ovens
- Ventilation Systems
- Kitchen Appliances

Core Benefits

Quiet Operation, Low Vibration, Robust Design, Efficient Cooling
