Product Overview

Professional Abrasive Flap Wheels

These high-quality shaft-mounted flap wheels are engineered for precision surface finishing, blending, and deburring. Featuring abrasive flaps arranged radially around a central hub, they provide excellent controlled material removal on both flat and contoured surfaces. They are compatible with standard rotary power tools, including drills, die grinders, and flexible shaft machines, making them essential for metalworking and woodworking projects.

Technical Specifications

Grit Size	120#
Design	Cylindrical, Disc, Shaft-mounted

Application

Applications

- Grinding
- Deburring
- Blending
- Polishing
- Contouring

Industries

Metalworking • Woodworking • Automotive
