

Shearer Pitch Control Box

This pitch box is designed for use in longwall mining shearers. It facilitates the adjustment of the cutting drum's pitch, optimizing coal extraction during mining operations.

Product Overview

Shearer Pitch Control Box

The Shearer Pitch Control Box is a critical component engineered for heavy-duty mining machinery, including continuous miners, scrapers, and longwall systems. Designed to withstand the rigorous demands of underground mining, this robust unit facilitates precise pitch adjustments for cutting drums to ensure optimal extraction efficiency. Its durable construction is built to endure harsh operational environments while maintaining reliable performance.

Technical Specifications

Weight Range

0.5 kg

Minimum Weight

100 kg

Maximum Weight

Compatible Machinery

Continuous Miner, Scraper, Longwall Machine

Identification

Known Identifiers
