

Sheet Glass Manufacturing Line

This sheet glass manufacturing line provides a complete turnkey solution for glass production. It is designed for durable performance and strong technical support.

ADDITIONAL IMAGES

Overview

Industrial Sheet Glass Manufacturing Solutions

This advanced manufacturing line provides comprehensive, turn-key solutions for sheet glass production. Designed for high efficiency and precision, the system supports a wide range of melting capacities and output thicknesses to suit diverse market needs. With proven global implementations, these lines are engineered to deliver consistent quality for standard and ultra-thin glass applications.

Technical Capabilities

Melting Capacity

10 TPD

Minimum Capacity

300 TPD

Maximum Capacity

Glass Thickness Range

0.8mm - 8mm

Specialized Capabilities

Ultra-thin glass production, 1mm thick glass stability, Turn-key project management

Equipment Systems

Integrated Processing Sections

- Melting furnace
- Forming section
- Annealing Lehr
- Cold end equipment
- Ultra-thin glass cutting
