

# Sheet Metal Bending Brake

This sheet metal bending brake is designed for precise and consistent bends. It is ideal for forming sheet metal in HVAC, roofing, and metal fabrication applications.

## Product Overview

### Precision Metal Forming

This heavy-duty sheet metal bending brake is engineered for precise and consistent bending in professional metal fabrication environments. Featuring a robust frame construction for long-term durability and stability, it is an essential tool for HVAC, roofing, and general metalworking applications. The unit includes advanced features like adjustable clamping pressure and a back gauge, ensuring repeatable results for every project.

## Technical Specifications

Working Length	200 mm
Max Bending Thickness	1 mm
Max Shearing Thickness	1 mm
Bending Angle Range	0-135 degrees
Material Capacity	20 gauge mild steel

## Features

### Key Features

- Adjustable clamping pressure
- Adjustable back gauge for repeatable bends
- Foot pedal operation for hands-free control
- Robust frame construction

Ideal Applications	HVAC, Roofing, Metal Fabrication
--------------------	----------------------------------

## Physical Dimensions

Packing Size	50 x 32 x 17 cm
Net Weight	11 kg
Gross Weight	12 kg
