

Sheet Metal Cutting and Folding Machine

This machine is designed for cutting and folding sheet metal. It delivers precise bends and cuts for efficient metalworking.

Product Overview

Versatile Sheet Metal Processing

This Sheet Metal Cutting and Folding Machine is engineered for precision and durability in metal fabrication tasks. It features an ergonomic design with a high-grip handle to ensure operator comfort and control during repetitive cutting and bending operations. Built to withstand rigorous industrial use, this tool provides reliable performance for various sheet metal applications.

Design & Ergonomics

Handle Color

Vibrant Blue

Handle Material

Durable Rubber

Handle Features

Ergonomic, Ribbed Grip, Anti-Slip, Textured Surface
