

Sheet Metal Cutting and Folding Machine

This machine is designed for cutting and folding sheet metal. It is suitable for various metal fabrication tasks, providing precise cuts and folds.

Overview

Precision Metal Processing

This versatile Sheet Metal Cutting and Folding Machine is designed for high-precision fabrication tasks, offering a robust solution for both cutting and bending operations. Engineered for efficiency, it allows operators to perform complex metal forming tasks with consistent accuracy. Its durable construction ensures reliability in demanding industrial environments, making it an essential tool for metalworking workshops and manufacturing facilities.

Technical Specifications

V-Belt Profile Dimensions

Belt Type	Top Width (mm)	Height (mm)
3VX	9.7	8
SPZX	9.7	8
SPAX	12.7	10
5VX	16.3	13
SPBX	16.3	13
SPCX	22	18

Core Capabilities

Sheet Metal Cutting, Sheet Metal Folding, Precision Bending, Industrial Grade
