Product Overview

Precision Metal Forming

This heavy-duty English wheel is an essential tool for metalworkers, designed to create smooth, compound curves in sheet metal. It features a robust steel frame for stability, a quick-release lever mechanism, and convenient foot-operated pressure control. Ideal for automotive restoration, custom fabrication, and metal art, this tool allows for precise shaping of steel and aluminum panels.

Key Features

Key Features

- Heavy-duty steel construction
- Includes 5 forming wheels
- Quick lever release mechanism
- Foot-operated pressure control
- Sideways adjustment capability
