

Sheet Metal Shears with Ergonomic Grip

These metal shears are designed for cutting sheet metal and other materials. They feature hardened steel blades for durability and precise cuts, along with a comfortable grip and locking mechanism.

Product Overview

Professional Sheet Metal Shears

These sheet metal shears are engineered for precision and durability in demanding work environments. Featuring hardened steel blades, they ensure clean, accurate cuts on various metal materials. The ergonomic orange handle design, combined with a spring-assisted opening mechanism, minimizes user fatigue during extended use, while the integrated locking mechanism provides safety during storage.

Technical Specifications

Blade Material	Hardened Steel
Handle Style	Ergonomic Grip
Opening Mechanism	Spring-assisted

Features

Applications

- Sheet metal cutting
- General metal fabrication
- HVAC installation

Safety Features

Locking Mechanism, Ergonomic Design
