

# Sheet Metal Snips

These tin snips are designed for cutting sheet metal. They feature high-leverage handles and forged steel blades.

## Product Overview

### Professional Grade Sheet Metal Snips

These heavy-duty snips are expertly crafted from 55# drop-forged steel, ensuring superior strength and long-lasting durability for demanding metal fabrication tasks. The cutting edges have undergone precise heat treatment to maintain a sharp, clean cut even after repeated use. Designed for comfort and control, the two-tone dipping handles provide an ergonomic grip that reduces user fatigue during extended projects.

## Technical Specifications

Material Composition	55# Forged Steel
Manufacturing Process	Drop Forged, Heat Treated

## Design Features

### Recommended Applications

- Sheet metal cutting
- HVAC ductwork
- Roofing installation
- Metal fabrication

Handle Design	Two-tone dipping ergonomic grip
