Product Overview

Professional Grade Sheet Metal Snips

These professional-grade snips are drop-forged from high-quality S55C or 60CR-V steel for superior durability and performance. Designed with induction-hardened cutting edges, these tools deliver a hardness of 55-61HRC, ensuring clean and efficient cuts on sheet metal. Available in multiple sizes, they are ideal for demanding applications in HVAC, roofing, and general metalworking.

Technical Specifications

Body Material	S55C or 60CR-V Steel
Cutting Edge Hardness	61 HRC
Body Hardness	48 HRC
Available Finishes	Power Coating, Black Oxide, Natural Finish
