

Sheltered Bus Stop with Advertising Panels

This bus stop provides a sheltered waiting area for public transportation users. It features integrated, backlit advertising panels for enhanced visibility.

Product Overview

Modern Sheltered Bus Stop

This modern bus stop structure is designed to provide a comfortable and informative waiting environment for public transportation users. It features a durable aluminum frame with a sloped roof for efficient water runoff and sturdy support legs for maximum stability. The design integrates backlit advertising panels that are optimized for high visibility and easy poster maintenance.
