

Shielded Audio Cable for Speakers and Sound Boxes

This audio cable is designed for optimal signal transmission. It features shielded conductors to minimize interference and a durable outer jacket.

Product Overview

Professional Audio Connectivity

This shielded audio cable is engineered for high-fidelity signal transmission between speakers and sound box systems. Its robust construction features multiple shielded conductors specifically designed to minimize electromagnetic interference and maintain maximum signal clarity. The durable outer jacket protects the internal wiring, ensuring long-lasting performance in professional audio environments.

Technical Specifications

Design Type	Shielded multi-conductor
Shielding Efficiency	Yes

Applications

Supported Equipment	Speakers, Sound Boxes, Professional Audio Systems
