

Shielded CAT6A Keystone Jack

This shielded CAT6A keystone jack is designed for high-performance data networks. It supports 10 Gigabit Ethernet applications and features robust construction for reliable connections.

Product Overview

High-Performance CAT6A Connectivity

This shielded CAT6A keystone jack is engineered to support demanding 10 Gigabit Ethernet applications in modern structured cabling systems. The toolless, 180-degree design allows for rapid and reliable termination, significantly reducing installation time for professional network installers. Its robust shielded construction provides excellent protection against external interference, ensuring high signal integrity for critical data infrastructure.

Technical Specifications

Shielding
STP

Category Type

CAT6A

Installation

Toolless

Orientation

180 degree

Performance Features

Supported Applications

10 Gigabit Ethernet, High-performance networks
