

Shielded SCART AV Cable

This shielded SCART cable connects audio-visual equipment such as DVD players, VCRs, and game consoles to televisions and other displays. Gold-plated pins ensure optimal conductivity and corrosion resistance, providing a reliable connection for high-quality audio and video transmission.

Overview

High-Performance AV Connectivity

This shielded SCART cable is engineered for reliable audio-visual signal transmission between legacy equipment and modern displays. Designed for durability, it features robust construction with molded connectors and a thick, flexible cable that ensures long-term signal integrity. With gold-plated pins, it provides superior conductivity and corrosion resistance for high-quality video and audio output.
