

# Shielded Serial Communication Cable

This shielded serial cable is designed for dependable signal transmission. It features a central conductor, insulation, braided shield, and outer jacket.

## Product Overview

### Professional Shielded Serial Communication Cable

This shielded serial communication cable is engineered for robust signal transmission in demanding electronic environments. Featuring a high-quality central conductor protected by specialized insulation and a braided shield, it minimizes electromagnetic interference for consistent performance. The durable outer jacket ensures longevity and reliability in various industrial and commercial applications.

## Technical Construction

### Cable Components

- Central Conductor
- Insulation Layer
- Braided Shielding
- Outer Protective Jacket

Shielding Type

Braided Shield

## Certifications & Compliance

Compliance

Shielded, Serial Communication, Electronic Grade
