

Ship Construction

Ship construction involves the fabrication of vessels. This process typically occurs in a dry dock using cranes and scaffolding.

Overview

Comprehensive Shipbuilding and Maintenance

Our professional ship construction and repair services provide a high-precision environment for maritime structural work. Utilizing advanced dry dock facilities, we facilitate large-scale hull assembly, specialized painting, and complex heavy-lifting operations. These services ensure that all vessels undergo rigorous construction or maintenance cycles within a safe and controlled professional setting.

Operations

Major Equipment

- Tower Crane
- Scaffolding Infrastructure
- Dry Dock Support Structures

Facility Type

Dry Dock

Capabilities

Hull Assembly, Surface Coating, Structural Repair, Heavy Lifting
