

Shipbuilding Crane with Tracked Chassis

This heavy-duty crane is designed for shipbuilding and marine applications. It features a tracked chassis for stability and mobility in demanding environments, along with a telescopic boom and robust hoisting mechanism.

Product Overview

Heavy-Duty Marine Solutions

This specialized shipbuilding crane is engineered for superior stability and mobility within demanding marine environments. Featuring a rugged tracked chassis and a precision telescopic boom, it facilitates efficient lifting and assembly of heavy maritime components. Designed for versatility, it is an essential asset for shipyard operations requiring consistent performance in loading and positioning large structures.

Technical Specifications

Chassis Configuration	Tracked
Boom Type	Telescopic
Target Applications	Shipbuilding, Marine Assembly, Loading and Unloading, Structure Positioning

Operational Capabilities

Key Operational Metrics

1 Tracked

Chassis Mobility
