

Shock Absorber Rotation Signal Wheel

This signal wheel is designed for use in shock absorber systems. It is manufactured from high-quality metal and features evenly spaced teeth for accurate signal generation.

Product Overview

Precision Shock Absorber Signal Wheel

This precision-engineered signal wheel is designed specifically for integration into high-performance shock absorber systems. It features an array of accurately spaced teeth around its circumference to ensure consistent rotational feedback in automotive and industrial applications. Crafted through advanced stamping techniques, the component provides robust durability and precise performance in demanding environments.

Production Capabilities

Manufacturing Infrastructure

Equipment Type	Quantity
16T-60T Punching Press	16
45T Multi-station Punch Press	16
160T Precision Press	3
15T-80T High-speed Press	8
5T-200T Punching Press	24

Stamping & Forming Processes

Deep Drawing, Extruding, Piercing, Coining, Reverse Burring, Blanking, Forming, Embossing

Application

Common Industrial Applications

- Shock Absorber Systems
- EPS Steering Motor Housing
- Automobile Sensor Signal Systems
- Automobile Engine Systems
- Lithium-ion Battery Housings
- Electronic Componentry
