

Shop Dust Collection System

This dust collector efficiently removes dust and debris in woodworking and shop environments. It features a high-capacity collection bag, a powerful motor for strong suction, and a flexible hose for easy maneuverability.

Overview

Professional Dust Management

This 2 HP dust collection system provides powerful performance for woodworking and industrial shop environments. Designed for efficiency and mobility, it delivers 1550 CFM of airflow to maintain a clean and safe workspace. The unit features high-filtration capabilities and user-friendly design elements like translucent collection bags and locking casters for easy positioning.
