

Short Handle Bulb Planter

The short handle bulb planter is a hand tool designed for planting bulbs, seedlings, and small plants. It features a cylindrical metal body with serrated edges at the bottom to easily penetrate the soil.

Product Overview

Professional Planting Solution

The short handle bulb planter is a versatile hand tool engineered for efficient planting of bulbs, seedlings, and small plants. Featuring a specialized cylindrical metal body with serrated edges, it allows for easy soil penetration and the creation of uniform holes to ensure consistent depth and spacing. Designed for both professional landscapers and gardeners, this tool streamlines the planting process to promote healthy root development and overall plant growth.
