

Shredded Copper Wire Scrap

High-quality shredded copper wire scrap is suitable for recycling and industrial applications. This material consists of finely shredded copper wires, offering a high copper content for efficient processing and reuse.

Product Overview

High-Quality Shredded Copper Wire Scrap

This product consists of finely shredded copper wire scrap, specifically processed for recycling and industrial metallurgical applications. The material is optimized for high copper recovery, ensuring efficiency in reuse and manufacturing processes. It is delivered in a compacted and baled format to facilitate easier handling, storage, and cost-effective transportation for international buyers.

Material Characteristics

Processing State

Shredded • Compacted • Baled

Material Type

Shredded Copper Wire

Applications

Primary Uses

- Recycling
- Industrial metallurgical applications
- Copper recovery operations
