

Shrink Wrap Packaging Machine

This shrink wrap machine is designed for efficient and reliable packaging of various products. It utilizes heat to tightly wrap items in plastic film, providing protection and tamper evidence.

Product Overview

Advanced Shrink Packaging Solution

The 4035 Shrink Packaging Machine utilizes advanced heat-shrink technology to provide a secure, professional finish for various small products. By applying controlled heat, the machine shrinks plastic film tightly around items to enhance presentation, increase product value, and provide protective sealing against moisture and contamination. This compact yet robust system is engineered for industrial consistency and reliability.

Technical Specifications

Performance Metrics

7 Kw Total Power	5 kg Max Load Capacity	10 m/min Max Conveyor Speed
----------------------------	----------------------------------	---------------------------------------

Capacity & Physical Specs

Parameter	Value
Shrink Size	400 x 350 mm
Machine Dimensions	200 x 600 x 900 mm
Machine Weight	60 kg

Operational Details

Operating Parameters

- Temperature range: 0-300 °C
- Voltage options: 220V or 380V
- Frequency: 50Hz

Key Benefits

Tamper-evident sealing, Moisture resistance, Pollution protection, Enhanced product aesthetics, Multi-item bundling
