

Side and Face Milling Cutter

This high-speed steel side and face milling cutter is designed for slotting, grooving, and general milling applications. It features precision-ground teeth to ensure smooth cutting action and effective chip evacuation.

Product Overview

Precision Milling Performance

This high-speed steel side and face milling cutter is engineered for demanding slotting, grooving, and general milling applications. Featuring precision-ground teeth, it ensures smooth cutting action and superior chip evacuation performance. The body is specifically hardened and tempered to provide enhanced durability and wear resistance during operation.

Technical Specifications

Construction Standards

- Hardened and tempered body
- Precision-ground teeth
- Industry standard accuracy

Compatible Materials

Steel, Aluminum, Plastics

Mounting Type

Arbor mount

Performance Features

Operational Benefits

1 Excellent
Chip Evacuation

1 High
Durability
