Product Overview

High-Capacity Cooling Solution

This premium side-by-side refrigerator offers a massive internal volume divided into 22 independent storage zones for optimal organization. Featuring advanced intelligent inverter technology and frost-free air cooling, it ensures consistent temperatures and long-term food preservation. The integrated ionization system provides effective disinfection and deodorization, maintaining a fresh environment for your perishables.

Key Features

Core Features

- 90° door opening angle for easy access
- Frost-free air cooling technology
- Intelligent inverter system for energy efficiency
- Built-in ionization for disinfection and odor removal
