

Side-by-Side Refrigerator

This side-by-side refrigerator features a frost-free design and intelligent technology. It also has an LED display and a direct current fan.

Overview

Professional Side-by-Side Refrigeration

This high-capacity side-by-side refrigerator provides advanced food preservation through a fully three-dimensional air supply system. Designed for efficiency, it incorporates intelligent temperature sensing with 1-degree precision to minimize fluctuations and maintain freshness. The unit also features energy-saving DC fan technology and an integrated anti-bacterial system using precious metal catalysts to eliminate odors.

Performance Metrics

Core Performance Metrics

Technical Specifications

Model Information	BCD-560WK
Energy Consumption	1.41 Kw.h/24h
Deep Freezing Volume	206 L

Advanced Features

Key Technological Features

- Frost-free design
- Intelligent computerized temperature control
- Anti-bacterial TST accelerant technology
- Energy-efficient DC fan cooling

Interface

Display Technology	120-degree high-definition LED
