

Side Sealing Plastic Bag Making Machine

This machine is designed for efficient production of side-sealed plastic bags. It integrates sealing, cutting, and automated material handling for high-volume output.

Product Overview

High-Efficiency Side Sealing Solution

This side sealing plastic bag making machine is engineered for high-volume industrial production, offering robust performance and versatility. It integrates essential processing units including side welding, die cutting, and specialized handle attachment systems to support the manufacturing of diverse bag styles. Designed with optional modular enhancements such as web guiding and automated collection, this system provides a scalable solution to optimize workflow efficiency and minimize manual intervention in packaging production.

Standard Features

Included Components

Side welding device, Die cutting unit, Poly draw device, Patch device, Soft loop handle device

Optional Configurations

Available Upgrades

Web guiding control unit • Pre-warming station • V-type sealing device • Auto collection device
