Product Overview

Professional LED Neon Flex Solution

This side-view LED neon flex strip is engineered for high-performance architectural and decorative lighting applications. Featuring a durable IP65-rated extrusion process, it delivers a uniform, hotspot-free light source suitable for both indoor and outdoor environments. Its flexible design allows for creative installation in curved or irregular spaces, ensuring reliable and long-lasting illumination.

Technical Specifications

IP Rating

IP65

Voltage

24 VDC

Power Consumption

14.4 W/M

Flexibility & Dimensions

Minimum Bending Diameter

Product Size	Min. Bending Diameter
11x20mm	100
6x12mm	40

Features

Key Features

- Side-view illumination design
- Uniform light output with no hotspots
- Durable extrusion construction
- Suitable for indoor and outdoor use
- High flexibility for custom designs
